**Abstract.** *This paper tries to forecast several aspects of Romanian economy future, starting from world financial crisis initiated by those who run international bank and financial system. The author considers that future of our economy should be thought in a systemic vision, taking into account the economy as a complex and dynamic cybernetic system, with self regulation, for which objectives should be set up regarding both its structure and functionality as well as its behavior.*

**Keywords:** world financial crisis, new world order, the country reindustrialisation, rural development, regionalisation, disequilibria of biosystems, life quality.

### 1. World financial crisis and Romanian economy crisis

Future of Romania, under actual conditions, should be regarded through the world financial crisis. Several voices state that this crisis was initiated at order by world „Elite”. The proof that guilty are those who run the bank and monetary system is that at the beginning of 2009, Americans had a lot of debts, USA national debt exceeding 10.000 billion USD, this being reflected by electronic outline of New York, which warn the Americans over the debt degree of their country.

Those who run the world try continuously to persuade mankind that the only solution to set up and keep the „world peace” is to create the world new order, unifying all the world superpowers. Indeed, the world new order means several plans of population massive reduction, democracy elimination and destruction of the nations sovereignty. These plans are kept secret and are gradually implemented, while population is greatly misinformed, in the *media*, because if it is openly announced, it would generate certainly violence and protests at international level.

At present, number of countries asking for helping funds is higher and higher, starting with those from Eastern Europe, to those from Latin America, Africa and Asia. Financial need of these countries reached over 600 billion USD, which would exceed the IMF possibilities and would impose to rise taxes of deposits for those 185 member states. Therefore, the solution to establish the world new order, to solve actual economic crisis, is in fact, to settle a financial dictatorship. Thus it is outlined the solution to create an
