CONTENTS

REVIEW PAPERS

A. NUCLEAR PHYSICS

1. R. Budaca
Collective Excitations in Atomic Nuclei with Energy-Dependent Potentials 7
2. D.S. Delion, A. Dumitrescu, and V.V. Baran
Alpha-Resonances in Medium and Heavy Nuclei
I. Review of Phenomenological Models 38
3. D.S. Delion, V.V. Baran, and A. Dumitrescu
Alpha-Resonances in Medium and Heavy Nuclei
I. Review of Microscopic Models 70
4. M. Mirea
Notes on Fission Dynamics 89
5. A.O. Pavelescu, C. Tuca, and M. Pavelescu
Assessment of Dose Rate and Risk Due To the Clean-Up Activities of
Depleted Uranium Workshop from the IFIN-HH VVR-S Research 140

B. OPTICS

6. D. Dragoman
Properties and Applications of Graphene 155
7. D. Dragoman
Quantum Computing in Graphene 165

C. ABSTRACTS OF PHD THESES

8. E. Vladescu - D. Dragoman (scientific coordinator)
Integrated Optical Circuits with Surface Plasmon Polaritons 181
9. D. Craciunescu - L. Fara and P. Sterian (scientific coordinators)
Development and Integration of Photovoltaic Complex Systems
in Optoelectronic and Power Applications 195

Series on PHYSICS AND CHEMISTRY SCIENCES

VOLUME 5

2020

NUMBER 1

ISSN ONLINE 2559-1061

TOPICS:

- Astrophysics
- Atomic and molecular physics
- Biophysics & medical physics
- Computational physics
- Condensed matter physics
- Environmental & earth physics
- Mathematical and general physics
- Nuclear physics. Particle physics
- Nuclear reactors physics – waste management
- Photonics & quantum electronics
- Physics methods & instrumentation
- Plasma physics
- Analytical chemistry
- Chemistry education
- Computational chemistry
- Environmental chemistry
- Industrial & engineering chemistry
- Inorganic chemistry
- New materials
- Organic chemistry
- Physical chemistry
- Polymer/biopolymer chemistry
- Quantum chemistry
- Supramolecular chemistry
